Team ID	PNT2022TMID25383
Project Name	Project - web fishing detection
Maximum Marks	2 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve detecting fishing domain.

- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Therefore, passive queries related to the domain name,which we want to classify as phishing or not, provide use information to us.

## Example - Solution Architecture Diagram:
